

Sebastian Ghetu

Lead Mobile App Developer

ghetu.net

BIOGRAPHY

Mobile app developer, cloud computing enthusiast and master of finding simple solutions to complex problems, all rolled into one. My life focus is on craftsmanship in software development, whether that means delivering great user experiences, clean code or a system architecture that can scale.

CAREER

HEAD OF DEVELOPMENT

Roller Agency | Jul 17 - Present

Continued working as a developer, contributing to time-critical and high-value projects and personally leading the development of 3 projects.

Established processes for development and planning, enabling the company to undertake larger-scale projects. Introduced new technologies such as Amazon Web Services, Firebase and Realm Mobile Platform to increase productivity without compromising on quality.

Directly managed the relationship with the company's biggest client.

Got heavily involved in all new project proposals, deciding upon software stacks and time estimates. Pitched our proposals in front of potential clients.

MOBILE APP DEVELOPER

Roller Agency | Apr 16 - July 17

Helped architect and build 7 mobile applications for both iOS and Android, most published to app stores.

Designed and contributed to building a large scale iOS project (with over one year of continuous development) based on the MVVM architecture and ReactiveSwift.

MOBILE APP DEVELOPER

Cornerstone Technologies | Jul 15 - Aug 15

Designed and developed native Android, Android TV apps for a US-based media startup. Learned about iOS development and built a production-grade app in one month.

SKILLS

PRO

iOS Development
